

Maxclean Technology

Disposable Apparel

Features

Polypropylene (PP)

- A 100% non-woven material that is breathable and low linting
- An economical fabric designed for light manufacturing, medical, cleanroom food handling and industrial applications

Polypropylene (PE)

- Coated polypropylene has an added benefit of having a sheet of polyethylene bonded to its surface
- Provides protection where liquid splash is a concern
- An economical solution for light, non-hazardous protection

Microporus Coated Polypropylene (MP)

- A revolutionary coating that provides great combination of protection from non-hazardous liquid splash and breathability
- Comfortable to wear, this material is ideal for manufacturing and is used in primarily wet areas where keeping cool is a concern
